ENGINEERING DATA

Easyprod MX12

"I connect to all the machines in your factory !"

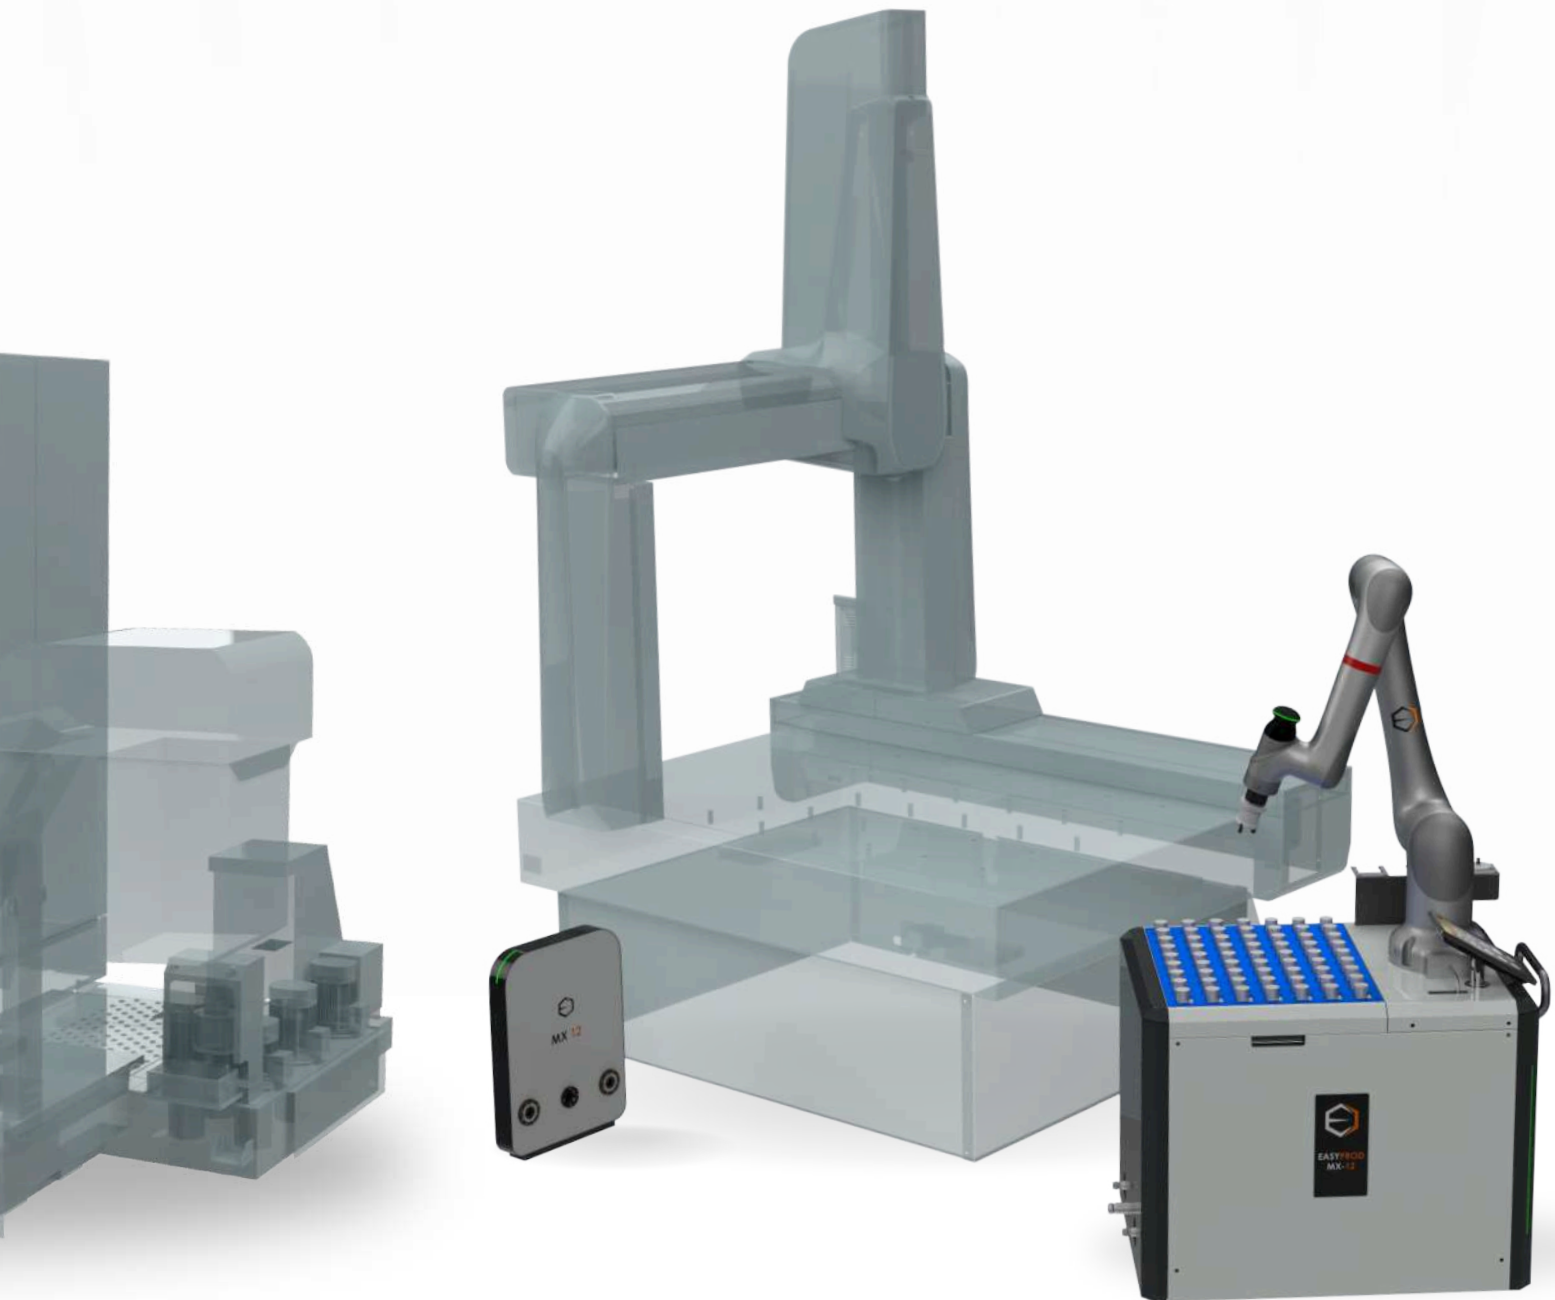

EasyDock Docking Station

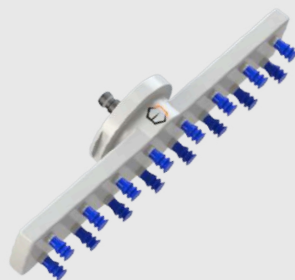

Carrying capacity of
between 8 and 20kg
depending on Model

Equipped with Auto Grip Changer

The EasyProd MX12 robot is a **moveable** bench equipped with a **robot** that can easily be moved from one machine to another by positioning itself on a station equipped with **Zero Point System**, with auto machine recognition.

Air suction grippers

Special Air suction grippers available on request

The advantages of the MX12

A system of removable grids allows you to increase the storage capacity of your parts.

The Engineering **Data** interface

In three clicks :

- *define the part to be produced (dimension)*
- *quantity to produce*
- *choose the gripper*

The largest range of Automation on the Market
